

## 2016 – 2022 Asbestos Fibers in Drinking Water

Below are the asbestos results from each year, along with the location of each test. Each result includes a detection threshold, which is the smallest amount that can be found with the laboratory testing method. This threshold changed in 2020 from 0.17 MFL to 0.16 MFL as the testing method used became more precise. All testing results are shown in MFL, which is a measure of million fibers per liter of water tested.

### 2022

Total Asbestos (MFL) <sup>a</sup>	Testing Results	Detection Threshold	Health Canada Guideline Water Quality Objective
110 Kress St.	Non-detect	0.16	Not Regulated
132 Victoria Ave	Non-detect	0.16	
2640 31 St	Non-detect	0.16	
1109 14th Ave.	Non-detect	0.16	
2626 Dewdney Ave E	Non-detect	0.16	
1101 Kramer Boulevard	Non-detect	0.16	
1201 Ross Ave.	Non-detect	0.16	
13 <sup>th</sup> Ave & Albert St.	Non-detect	0.16	
560 Elphinstone St.	Non-detect	0.16	
35 Davin Cres.	Non-detect	0.16	
815 Assiniboine Ave E.	Non-detect	0.16	

a. MFL is million of fibers per litre
